

# Robot Companions and Caregivers

## Benefits of Robot Companions and Caregivers for the Elderly and Disabled

### Reason

- As AI technology advances, applications for it have been expanding greatly. Using AI to help care for elderly and those with disabilities would greatly increase their quality of life and monitor them more thoroughly.

### Focus

- To research how far AI development regarding caretaking has come along and how it benefits the elderly and disabled communities.

### Role

- Peiyuan Li(Jackson) and Jiahe Teng(Simon) : Research, Collect information and Design our website.
- Falatugatuga Kerslake : Use the information gathered on our website for our presentation.
